real welding

welding with passion

Selco was established in 1979 and has been a protagonist in the field of electric arc welding for thirty years. By striving constantly to perfect and extend its range of products and services, Selco has established itself as one of Europe's leading suppliers of welding equipment.

Selco's original factory is located in Onara (Padua-Italy). A second factory has been opened in Cittadella (also near Padua) to supplement the first and to produce power sources and complete welding systems.

Customer service has also improved constantly over the years, and Selco products are now backed up by a highly competent and far-reaching sales network, efficient international customer care, and top class technical assistance.

The factory in Cittadella (Padua-Italy)

Head offices in Onara (Padua-Italy)

Selco is active on all main European markets:
Germany, France, Spain, Poland, Czech Republic, Romania, Russia and the U.K..

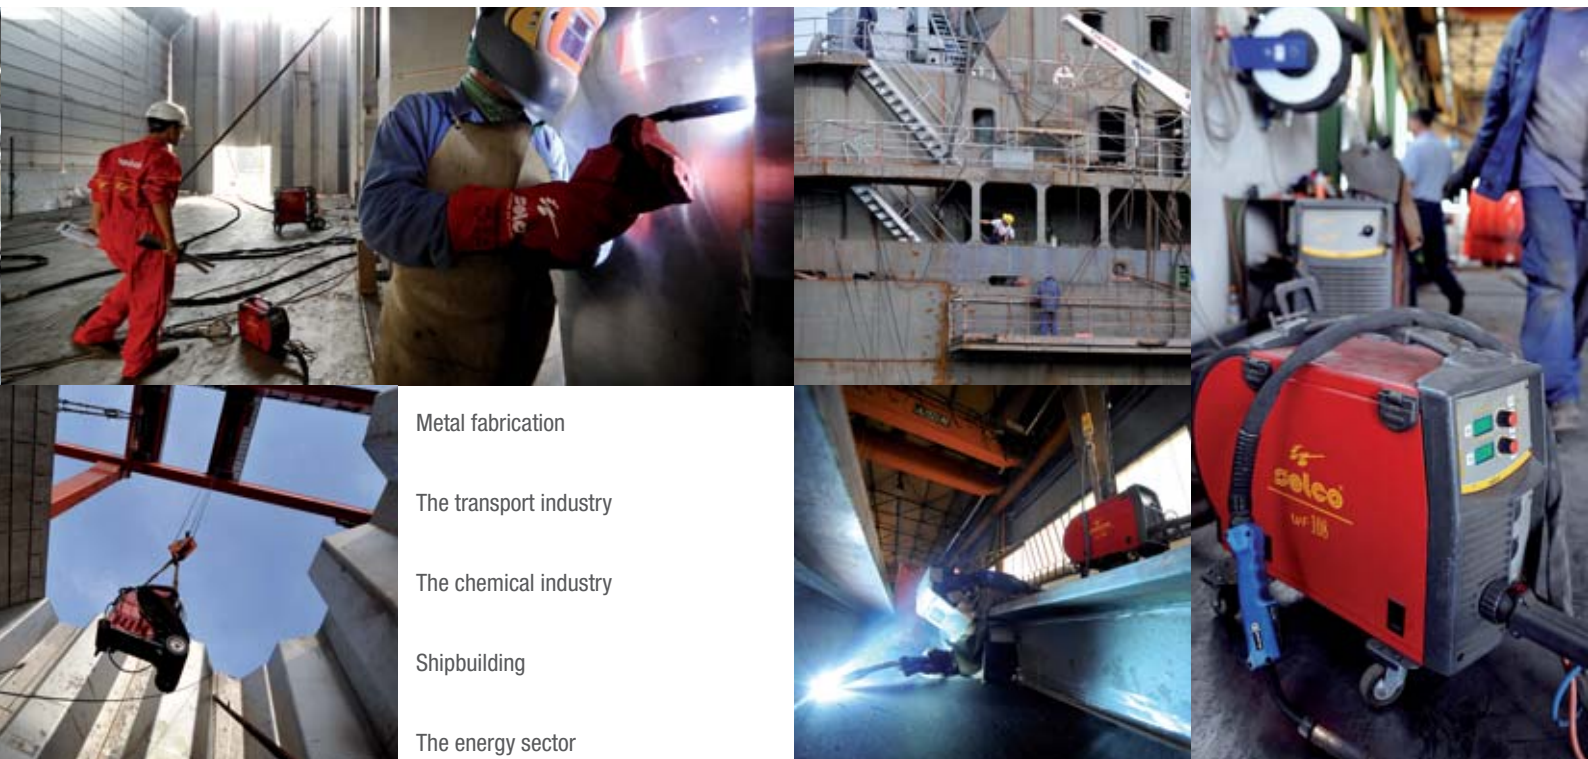

empathy

your business is ours too

Selco has been producing top quality, high-tech, professional welding systems for over thirty years for all types of application. Selco's success is based on in-depth understanding of the real needs of customers, and on the ability to provide the ideas and solutions to match them.

Our aim is to ensure that our customers can work to the best of their abilities, by giving them the best the market has to offer in terms of technology, efficiency, performance and service. Selco's true value and complete understanding of welding technology is best measured in the field.

Metal fabrication

The chemical industry

Shipbuilding

The energy sector

the power of ideas

Selco designs, develops and produces electric arc welding power sources for steel, stainless steel, aluminium, and other metals. The Selco range consists of over 60 models, covering all the principal welding processes (MIG/MAG, TIG, MMA) and plasma cutting. Selco's in-house research facilities have developed superbly reliable and efficient welding systems incorporating innovative technical solutions, many of which are covered by international patents.

Selco's latest welding power sources incorporate the innovative and patented Multiline Three-Level technology, developed by Selco to guarantee high efficiency current absorption from three phase supplies.
